ZAvblue 2

Centrifugal fan sets new standards

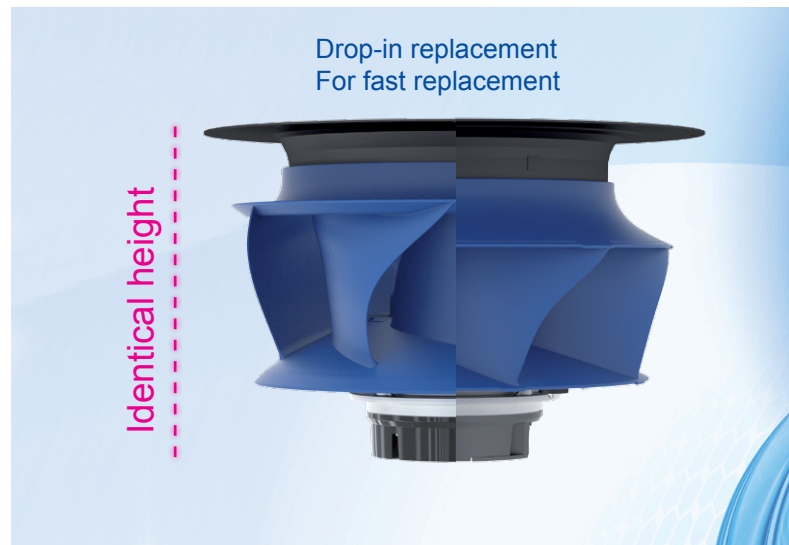

ZAvblue²

There's a new benchmark at the pinnacle of the fan market. It's called the ZAvblue², an advanced development of the high-volume star the ZAvblue. With a new, more comprehensive power range, the fan is a unique premium design and is the most innovative, climate-friendly performer in the ventilation technology sector.

Its striking features include the compact design with enlarged air inlet, achieved through technical refinements to the bionic blades and the overall concept, as well as perfect synchronization between ECblue motor and ZAvblue impeller, which enables the motor length to be reduced. Its industry-leading efficiency figures are unbeatable, while the successful reduction of the noise level by an impressive further 3 dB make the ZAvblue² unique and the clear top performer in its category.

Drop-in replacement means that fast replacement with even more efficiency, gentle, quiet running, sustainability and huge energy cost savings can be achieved immediately and without any hassle.

Developed for realistic installation situations - bring the future safely under control with the ZAvblue².

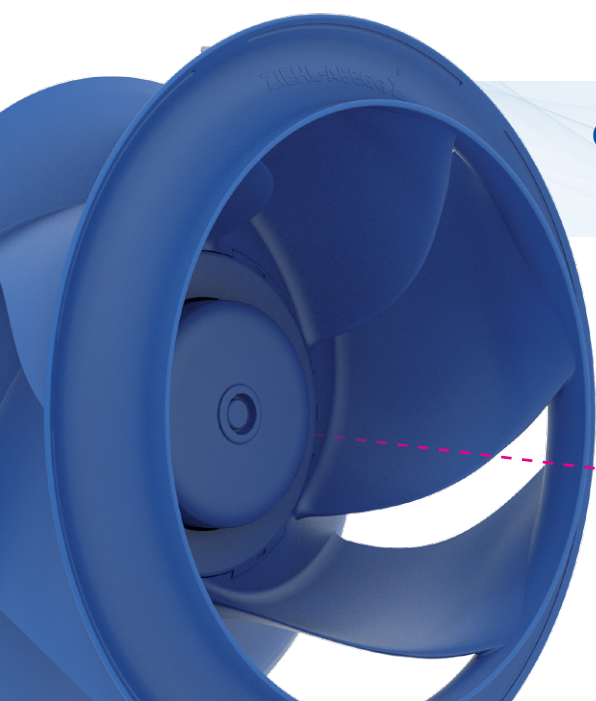

Identical installation space with significantly higher system efficiency

Extremely compact, even more efficient, even quieter -

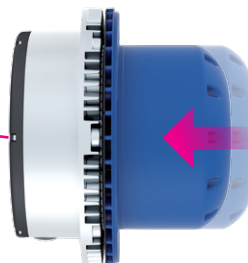

Exceptional advantages of the new ZAvblue²

- Over **70% system efficiency** – setting a new standard for flow-oriented centrifugal fans
- Very quiet even at maximum speed and high air output
- Outstanding performance even in tight installation situations
- Drop-in replacement - fast and hassle-free replacement for increased efficiency
- Huge energy and operating cost savings
- ZABluegalaxy - Intelligent IIoT Cloud for 360° overview of your networked devices
- Optionally with active PFC ECblue motor - for optimum safety and line quality

Climate-friendly, sustainable and reduced CO₂

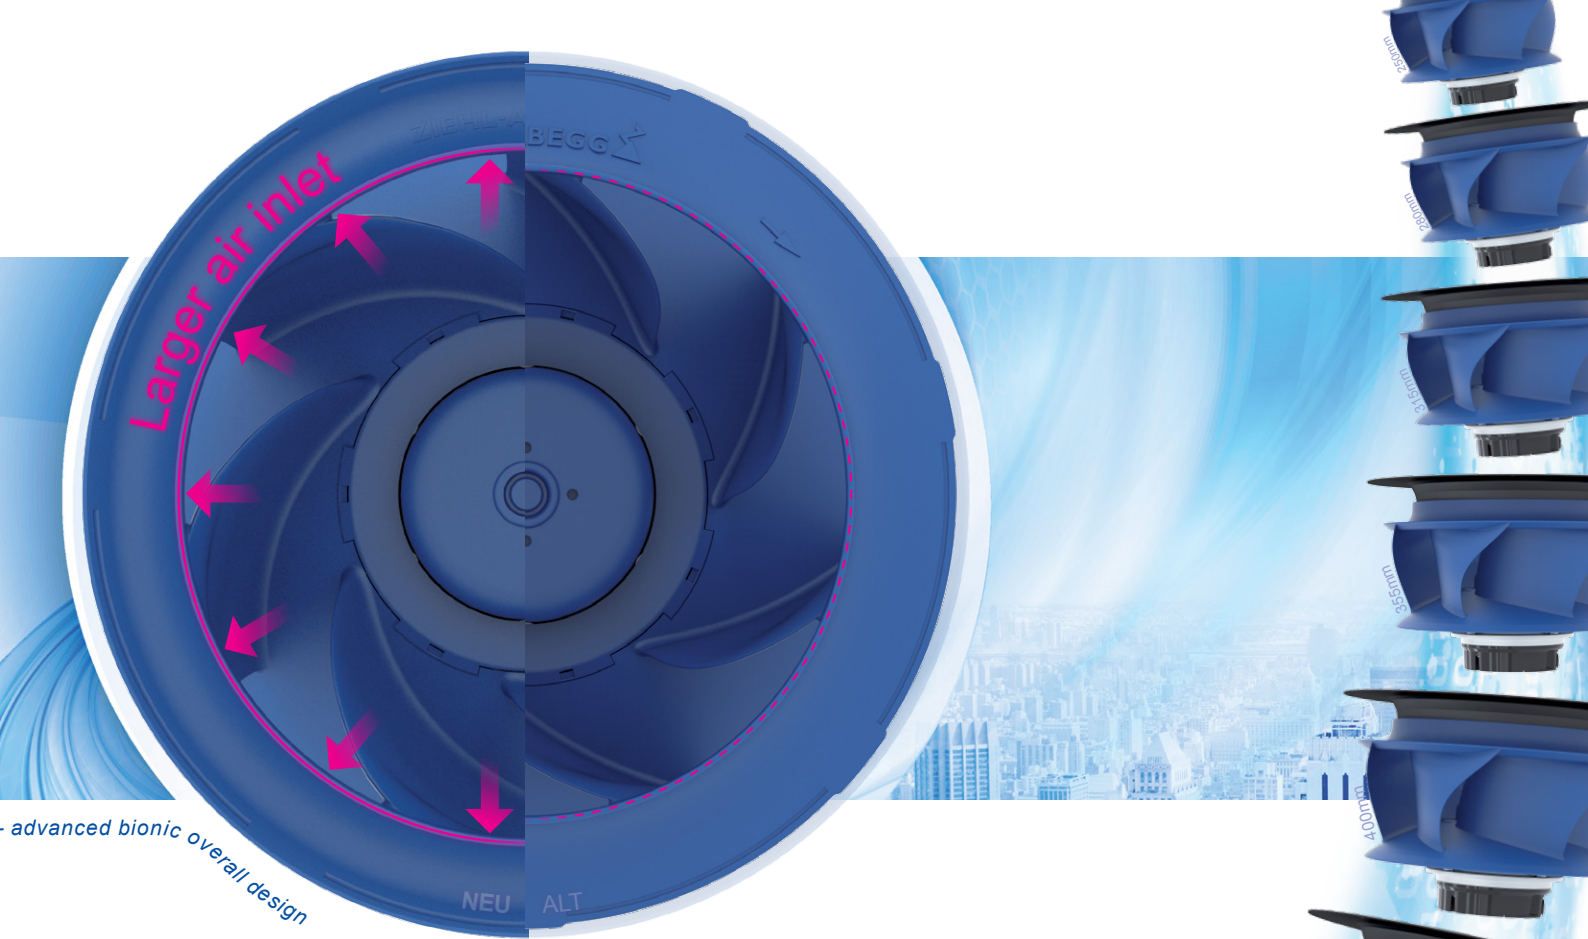

ZAvblue² – unrivaled intelligent fan technology

ECblue

Intelligent energy-saving motor

Shorter motor length with identical operating point -> More sustainability thanks to optimized use of resources

Advanced bionic overall design

ZAvblue₂ - the new high-flyer

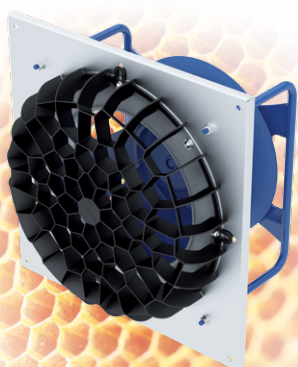

<p>Maximum efficiency Industry leader!</p>	<p>Lower noise Up to -3 dB</p>	<p>Drop-in replacement</p>	<p>Massively reduced energy costs Up to 10%</p>
